DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Atty. Don Bulson, Reg. No. 28, 192 on 5/7/10.

The application has been amended as follows:

11. (currently amended) A computer program product comprising a non-transitory computer-readable storage medium having computer-executable instructions stored thereon for implementing a telecommunications services method for use with a mobile telecommunications network, the method comprising, receiving a MAP Send Routing Information for Short Message (SRI SM message) originating from another network and forwarding the SRI SM message to a home location register, receiving a response from the home location register to the SRI_SM message, temporarily storing information relating to the SRI_SM response and passing said response on to a network address identified as the originating address, receiving a MAP Mobile Terminated Forward Short Message (MT Fwd SM message) from said another network and correlating the MT Fwd SM message with a previously-sent SRI SM response using stored information, detecting and selectively rejecting MT_Fwd_SM messages for which there is at least insufficient

correlation between the MT Fwd SM message and the previously-sent SRI SM response, and passing other MT Fwd SM messages on to their respective destinations.

Allowable Subject Matter

1. Claims 1-11 and 13-21, renumbered 1-20 respectively are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter: The Application is indicated as allowable since the closest prior art of record teaches comparing based on content filters and does not specifically teach receiving a MAP Send Routing Information for Short Message (SRI_SM message) originating from another network and forwarding the SRI_SM message to a home location register, receiving a response from the home location register to the SRI_SM message, temporarily storing information relating to the SRI_SM response and passing said response on to a network address identified as the originating address, receiving a MAP Mobile Terminated Forward Short Message (MT_Fwd_SM message) from said another network and correlating the MT_Fwd_SM message with a previously-sent SRI_SM response using stored information, detecting and selectively rejecting MT_Fwd_SM messages for which there is at least insufficient correlation between the MT_Fwd_SM message and the previously-sent SRI_SM response; and passing other MT_Fwd_SM messages on to their respective destinations.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See form 892.
